Such applications shall specify the date and time of proposed use, the estimated length of use and number of cranes needed. The crane user shall return the crane(s) without delay, upon completion of his operations. The crane user shall provide all necessary operators and perform all stevedoring required in connection with container crane(s) use. When the crane(s) is/are ordered but not used, and orders are not modified or canceled within 6 hours, standby time for maintenance personnel will be assessed at the current labor rates, subject to a minimum charge of two hours straight time or four hours overtime. Any incurred cost is the responsibility of the user; such as balance of guarantees, meal hours, or any other costs not covered under rental fee or start-up and secure. It shall be the ship's responsibility to stow all of its cranes in an offshore position prior to the time that the container gantry cranes are put into service. In the event that it is necessary to use the ship's cranes for any reason while the container gantry cranes are still in use at any time prior to the container gantry cranes' complete removal from the vessel, the container gantry cranes shall have the absolute right of way and all movements of the ship's cranes will be subservient to the container gantry cranes' movements and operations. Accordingly, it will be the responsibility and obligation of the ship and its stevedores to keep a proper lookout and to ensure that the movements or operation of the ship's cranes do not interfere with the operations or movements of the container gantry crane. The ship will not begin to move its cranes into sea position until after the container gantry crane has fully completed its operations and movements and is fully clear from the ship and its cranes. It shall be the stevedore's responsibility to assure that the ship is aware of and complies with its responsibilities to stow and operate its cranes in conformance with these regulations.
